OCT 22 2012

Dear Digital En-Route Supplement Customers,

Effective March 7, 2013, Federal Aviation Administration's (FAA) Aeronautical Navigation (AeroNav) Products will no longer provide Military Training Route (MTR) data in the Digital En-Route Supplement (DERS). This transition was advertised in late 2010 through the "Public DACS letter" posted to AeroNav's website.

Customers may obtain MTR data similar in content through a subscription to the National Airspace System Resource (NASR) subscriber files. The NASR subscriber files are available as a free download from the Facility Aeronautical Data Distribution System (FADS) via the National Flight Data Center (NFDC) web site. This website can be found at [nfdc.faa.gov](http://nfdc.faa.gov).

The FAA and AeroNav Products remains committed to a more efficient government, while maintaining the safety and integrity of the National Airspace System (NAS). This change allows the organization to continue to focus providing customers the most relevant products for navigation.

If you have any questions, please contact Richard (Scott) Jerdan at 301-427-5172 or by email at: [Richard.S.Jerdan@faa.gov](mailto:Richard.S.Jerdan@faa.gov).

Sincerely,

Debra E. Sullivan  
Acting Director, Aeronautical Navigation Products.
